# ***Not All Flameless Candles Are the Same The Artemis® Difference***

At Artemis®, flameless candles aren't just something we make—they're something we truly understand. We're the only major flameless candle brand produced by a real candle factory. That distinction matters.

Many flameless candles on the market are designed and manufactured by electronics or toy factories. While functional, they aren't built with the knowledge of how a real candle should look, feel, and perform. If your goal is the most realistic flameless candle available, that expertise makes all the difference.

# Formats

## CalmFlame®

- Patented visible flame design creates a beautiful “just lit” appearance
- Substantial black wick keeps the flame upright and natural
- Powered by 2 C batteries for up to 1,000 hours of runtime
- 6-hour timer and remote-control compatible
- Ideal for event professionals and home décor enthusiasts

## BrightWick®

- Patented LED design delivers exceptional glow and ambience
- The only flameless candle designed to look authentic—on or off
- Powered by 2 C batteries for up to 1,000 hours of runtime
- 6-hour timer and remote-control compatible
- A favorite among interior designers and home décor enthusiasts

# ***Realism***

## ***Our Goal, Not Just a Claim***

As a real candle company, we know exactly how a candle should look in use.

With **CalmFlame**, the flame stands upright with a subtle, calming flicker—no exaggerated movement, exposed plastic, or flimsy components. Just a steady, mesmerizing flame that feels authentic.

***CalmFlame***  
***Like a real flame***

***Competitor***  
***Crooked flame***

With **BrightWick**, the LED is carefully positioned to resemble a flame that has been gently burning for some time. When illuminated, a color-correct LED warmly lights the candle shell. When turned off, the wick appears naturally darkened, like a real candle that's already been enjoyed. There are no artificial yellow or orange lights, and no light spilling from the bottom of the candle. It simply looks real—on or off.

***BrightWick***  
***Warm glow***

***Competitor***  
***Fake glow & flame***

Our patented illumination technology allows the candle shell to take center stage, just as it does with a traditional candle. Because we don't need to hide exposed components or force light through unnatural parts of the candle body, we can use any candle shell exactly as a real candle would. After all, no one buys a candle for the flame alone—the décor lives in the candle itself. That's why at Artemis, our philosophy is simple:

**It's about the candle, not the flame.™**

# Safety

## So Much More Than Flameless

Yes, all flameless candles eliminate the risk of an open flame. But safety goes far beyond that.

At Artemis, we build our candles to higher standards. Our products are designed to meet FCC, RoHS, WEEE, and CE requirements, with compliance verified through independent certification testing. We strictly prohibit the use of materials listed under California Prop 65 and use non-lead solder to avoid introducing lead into our products.

We also use virgin wax rather than recycled wax, which often requires chemical treatment and bleaching. These decisions increase our costs—but they're non-negotiable. Because when it comes to products used in your home or at your events, **your safety matters.**
